Preface

Dear Hansa Green Tour friends,

See and experience things ourselves, crossing borders, reach out and meet interesting people. A tour to promote sustainable technology, to share experiences and to get inspired and inspire each other. This is what the Hansa Green Tour is all about.

This 10th anniversary edition of the Hansa Green Tour we will drive from the Johan Cruijff Arena in Amsterdam to BLOXHUB in Copenhagen, Denmark. The new hub for sustainable urban development. It is my pleasure to present this 2019 program to you that was made possible together with all our partners and sponsors in the Netherlands, Germany and Denmark.

This year's route will bring us to several inspiring locations and we will have interesting networking events in the evening. To share knowledge and experiences, to learn from each other and from 'best practises'. The kickoff is at Tuesday evening 18th June at the Johan Cruijff Arena in Amsterdam, the most sustainable stadium in the world. The official start of the program is Wednesday morning 19th June at Enexis regional headquarters in Zwolle. Enexis is the largest Dutch grid operator. Here we will learn more about the future of the electricity grid and its role in the energy transition. First stop will be at the NAM headquarters in Assen to discuss the future of the gas infrastructure and decarbonization opportunities using hydrogen and biogas. Next stop will be at RWE in the Eemshaven where we will visit the largest and most modern coal plant in the Netherlands. Here we will see the facilities and discuss decarbonization opportunities and ideas how to make the coal plant CO2 neutral and/or carbon negative. At Groningen Seaports we will close the day with a networking dinner and presentation how to comply with the Paris Agreement and meet the CO2 reduction goals in the northern Netherlands.

The next day we will visit the new exhibition 'Zukunft Mobilität' in the Bremer Universum and the Mercedes-Benz plant where we will visit the new assembly line for the production of the brand new all-electric Mercedes-Benz EQC. From Bremen we will then drive to Esbjerg in Denmark to join the reception of the North Sea Energy Ministers. The final day we will drive to Copenhagen where we will visit Copenhill, the new state-of-the-art zero emission waste-to-energy plant and BLOXHUB, the new hub for sustainable urban development. In Copenhagen will close the program with a networking reception at the residency of the Dutch Ambassador for Denmark, Mr. Henk Swarttouw.

All program details you will find in this program book.

Let's connect and share our sustainable networks!

I would like to thank our sponsors, program partners, participants and ambassadors of the Hansa Green Tour for their support to make this 10th anniversary edition possible.

I wish you all a good journey, good business and drive safely!

Roel Swierenga

Chairman Hansa Green Tour Foundation

Program Hansa Green Tour 2019

From Johan Cruijff Arena in Amsterdam to BLOXHUB in Copenhagen, Denmark

Hansa Green Tour organizes unique networking tours and trade missions for business people and policy makers with a strong interest in sustainable technology and renewable energy. To share knowledge and experiences and learn from 'best practises' and each other.

This 10th edition of the Hansa Green Tour will start in Amsterdam with the kickoff in the Johan Cruijff Arena, Tuesday evening 18th June. Here we will start with a networking dinner and Innovation Tour, showcasing the sustainable innovations that make this stadium one of the most sustainable in the world. Wednesday morning 19th June is the official start of the Hansa Green Tour 2019 at the regional headquarters of Enexis in Zwolle, the largest Dutch grid operator. From here our journey will take us to the inspiring visits along the route and networking evenings as listed below in the Netherlands, Germany and Denmark.
